

## BARRE LOST LAST NIGHT

Very Poor Bowling by the  
Local Men

### AGAINST MONTPELIER MEN

Hackwell of the Visiting Team Was  
the Highest Roller of the Evening,  
With a Single of 221 and a  
Total of 545.

The Barre big pin men didn't have a line on the head pin at last night and, indeed, some of the best bowling of the evening was done by the Montpelier men, who took out one of the three strings and piled up a total of 2322, to 2370 for the home team. With the exception of Odell and Hackwell of Montpelier and Averill of Barre, the rollers did very poorly, and the three men mentioned didn't do anything startling, although Hackwell managed to chalk up a 221 single string. Hackwell also had the highest three-string total of 445, which was good compared with the others. Averill of Barre had the highest three-string total of the Barre bunch, with 521. The scores were as follows:

Montpelier.		
Holt	171	141
Odell	166	180
Hackwell	221	180
Corcoran	193	126
Daley	112	174
Totals	863	780
Barre.		
Smith	133	180
Fraser	147	148
Nut	150	168
Averill	209	100
Walsh	164	145
Totals	503	602

### CLAN GORDON WON.

Defeated G. C. I. A. in Both Checkers  
and Chess Matches.

The Clan Gordon checker team won from the G. C. I. A. team, the win-up coming yesterday. The scoring was as follows:

Clan Gordon.		
2 J. Given	M. Kenefick	2
A. Stephens	Howell	1
2 H. Crutcher	J. C. Lawson	0
2 D. Stephens	J. A. Allan	0
0 A. Rennie	J. Brown	4
1 D. Stewart	J. Crutcher	3
2 J. Crutcher	J. Farquhar	2
2 C. Birnie	R. W. Craig	1
A. Milne	C. Michelson	0
4 M. Patterson	E. Johnson	0
4 Brown	Neddie	0
4 Donald	Broadie	0
2 Downes	Williams	1
4 Marr	Duncan	0

Clan Gordon also won the chess match from the G. C. I. A. 4 to 2.

### OLIVE LEAVES \$50,000,000.

Was at the Head of the Largest Plough  
Concern.

South Bend, Ind., March 19.—The will of James Oliver, inventor of the chilled plough, proprietor of the largest plough plant in the world, public benefactor and the richest man in Indiana, was filed for probate Tuesday in the 88. Joseph circuit court. Family ties are shown in the distribution of the vast fortune, which is reported to be from \$50,000,000 to \$60,000,000. The bulk of it is left to Joseph D. Oliver, son of the deceased, to be administered by means of a trust. The trust estate will be distributed eventually among the grandchildren when the youngest, Gertrude, shall have reached the age of thirty years.

## Cure For Drunkenness

Orsine Treatment to Be Used at Home  
Without Publicity, or Loss of  
Time From Business.

The best aid to temperance is something that will strengthen the drunkard's weakened nervous system and cure his insatiable craving for drink. No one believes that any man who really desires to be cured of the liquor habit can cure himself by using Orsine. This remarkable treatment has made so many cures that we are glad to sell it under an absolute guarantee to refund the money if it does not cure.

It is in two forms: No. 1 that can be given secretly, and No. 2 for those who wish to be cured. It is not only the most reliable treatment known, but it is also the most economical as it costs only \$1 a box and there is no deduction from the usual duties, while if a cure is not effected, there is no expense whatever. Mail orders filled on receipt of price in plain sealed package. Write for free booklet. The Orsine Co., Washington, D. C., or Elbert & Wells, Barre, Vt.

## FIRE Insurance Rates REDUCED

Seventeen old reliable Stock  
Companies and five Mutuals  
Take your choice. Call and in-  
vestigate. Any competition met,  
in companies that have had an ex-  
perience of from 25 to 100 years.

### J. W. DILLON,

## Hood's Sarsaparilla

The standard blood-purifying medicine.  
In usual liquid or new tablet form.

### KRONPRINZ HIT BY ANOTHER SHIP DURING FOG.

Transatlantic Liner Anchored in New  
York Bay Yesterday With 392  
Passengers. Hit By Crown  
of Castle.

New York, March 19.—The big transatlantic liner Kronprinz Wilhelm, which arrived yesterday from Europe, was struck by the steamer Crown of Castle while anchored in the bay in a thick fog.

When the Kronprinz Wilhelm with 392 passengers reached her dock in Hoboken there was a triangular hole about 16 by 15 feet in the steamer's overhang. The prow of the Crown of Castle penetrated the Kronprinz Wilhelm's hull a distance of about 15 feet into the quarters occupied by the steward.

Water-tight doors on the Kronprinz were closed but it was ascertained that she had suffered no damage below the waterline.

When the Kronprinz left quarantine the fog was not thick enough to prevent a good vision of the harbor but the steamer had gone only about two miles when the mist closed thickly about her and Capt. Nierich anchored off Robbins reef to await the lifting of the fog.

Warning fog bells were rung on the liner, but the steamer had been at anchor only five minutes when the quartermaster on the bridge telephoned to the captain that a steamer was coming up stream headed directly for the Kronprinz. Capt. Nierich promptly ordered the chain dropped, the engines started ahead and the water-tight doors in the steamer's compartments closed. There were 48 of these doors and they were closed in just 15 seconds.

The big steamer was just gathering headway when the Crown of Castle struck her fairly in the stern. The shock of the blow was only slightly felt on board the big liner and the two vessels quickly separated. But of them came to anchor again and lay there for several hours until the fog lifted when they proceeded to their docks.

The Crown of Castle's officers stated that no one was injured on board and that while the steamer's outboard was partly torn away near the main deck the damage would be slight.

### CLEVELAND TELLS PARTY HOW TO GET NEW LIFE.

Former President Sends Message to  
Democrats on 71st Birthday,  
Which He Observed at  
Lakewood.

New York, March 19.—Ex-President Grover Cleveland, on his 71st birthday, sends the following message to the Democratic party in reply to the question, "What is the best principle and what the best policy to give the Democratic party new life?"

As a general proposition I might answer this question by saying that in my opinion this could be most surely brought about by a return to genuine Democratic doctrine and a close adherence to the Democratic policies which in times past gave our party success and benefited our people.

To be more specific in my reply, I should say that more than ever just at this time the Democratic party should display honest and sincere conservatism as a regard for constitutional limitations and a determination not to be swept from our moorings by temporary clamor or spectacular exploitation.

Our people need rest and peace and reassurance; and it will be quite in line with true Democracy and successful policy to impress upon our fellow-countrymen the fact that Democracy still stands for three things.

Grover Cleveland.

### TARIFF REVISION WORRYING THE REPUBLICANS OF IOWA

Two Reports on Plank Probable at State  
Convention.

Des Moines, Ia., March 19.—The Republican convention which is to name four delegates at large to the national convention, instruct them for tariff, educational and platform calling for revision of the tariff, was called to order here yesterday, and after an address by the temporary chairman, adjourned until the late afternoon to await the committee reports.

Throughout the morning the working of the tariff revision plank of the platform was the subject of discussion among the Allison men. The wording most in favor calls for revision, "immediately after the inauguration of the next president." A special session of Congress will also be demanded.

The Cummins adherents are determined to force a vote on the adoption of the Ohio revision plank resolution, and two reports from the resolutions committee are probable.

### LABOR APPEARS IN DIVORCE SUIT.

Makes Counter Charges Against Mrs.  
A. Hart McKee, Who Sues  
Rusband.

Paris, March 19.—Maitre Labori yesterday presented to the court the side of the husband in the divorce suit brought in this city by Mrs. A. Hart McKee against Mr. McKee.

At the first hearing of the case on March 4, Mrs. McKee, through counsel, described certain alleged indignities to which she had been subjected by her husband.

Yesterday Maitre Labori made counter charges of a scandalous character against the wife, and declared that if the court granted a divorce it should pronounce in favor of the defendant and not in that of the plaintiff.

Mrs. McKee was the widow of Hugh Tevis at the time of her marriage to Mr. McKee in Philadelphia in January, 1905.

Maitre Labori declared that Mr. McKee married Mrs. Tevis to save her honor, he mentioned also an Italian marquis as a co-respondent.

## METCALF TO HAVE INQUIRY

Of His Own Into Armor Plate  
Matter

### PLANS STUDY AT 'FRISCO

Will Call on Admiral Evans for Data  
as to the Draft of the Ships at  
Target Practice in Magda-  
lena Bay.

Washington, March 19.—Secretary Metcalf intends to conduct an investigation of his own into the question of the waterline armor-belt of the battleships, which some critics of the navy have declared to be too low for safety.

He will call on Admiral Evans for data showing the draught of the battleships respecting the armor belt during their target practice at Magdalena bay. He will supplement this with some observations of his own when he reaches San Francisco to review the Atlantic and Pacific fleets there on May 9.

Secretary Metcalf's data will not be submitted to the Senate committee on naval affairs, which is investigating the armor belt controversy, unless Chairman Hale asked for it.

It is planned by the navy department to have the Atlantic battleship fleet reach Manila on its return cruise about Sept. 15. While the details of the itinerary have not been arranged, it is probable that about six weeks will be spent in target practice, fleet maneuvers, the necessary docking and repairing necessary on the various ships.

### INERT AND INEFFICIENT.

G. O. P. Drunk With Power, Hull De-  
clares.

Washington, March 19.—"Drunk with power, the Republican party has become inert and inefficient, corrupt and servile. It has achieved its manifest destiny. It has neither reformed nor commended. It failed to look at the signboards and ran the car of prosperity on to a commercial turndown." In those words Mr. Hull, in the House of Representatives yesterday, expressed his opinion of the Republican party.

"Having thus proclaimed," he said, "our Republican friends should cheerfully take the dose of their own medicine, however bitter, that inevitably awaits them at the polls in November."

Mr. Hull arraigned the Republicans for failing to provide remedial legislation that the country was demanding.

### FIRES IN CROWD.

Youth Kills Man, Wounds Another and  
Shoots Himself.

Chicago, March 19.—Donald R. Starr, a youth 21 years old, apparently crazed by drink, killed one man, wounded another and then fired a bullet into his body on a station of the South Side L. last night. Edward C. Hoffman, a special policeman was the man killed; James L. Marlin, a bystander, was the man wounded. Starr, after turning the weapon on himself, was carried away on a stretcher in a dying condition.

The trouble started when a guard put Starr off the train for disorderly conduct. This so enraged him that he drew a revolver and fired at random in the crowd. Several persons were injured in the rush to escape. Starr recently came to Chicago from California and lived with his widowed mother.

### JACKSON MAY FACE INQUIRY.

Senator Saxe Calls For Investigation  
—Resolution in New York Senate.

Albany, N. Y., March 19.—An immediate and effective investigation of the administration of his department, especially in connection with New York city financial institutions and receivership cases, may be made by the legislature.

At the request of the most important banking interest of New York city, Senator Martin J. Saxe (Rep. of New York) yesterday introduced a concurrent resolution providing for the appointment of three senators and five assemblymen to conduct the investigation.

The evidence against the attorney-general and his administration is being prepared in New York city and will be ready within a week.

### CATARH A GERM DISEASE.

Success of Hyomei Guaranteed By The  
Red Cross Pharmacy.

Catarh is an insidious disease of most destructive tendency. Its approaches are unassuming and its victims are well on the road to a chronic stage or to dread consumption before they realize their danger.

It is not a blood disease, but is caused by germs that lodge and grow in the air passages, causing irritation with poisonous and offensive mucous discharges. To cure this condition, stomach dosing is ineffective and the only healing agent is Hyomei. It goes directly to every weak root and center of the air passages, disinfecting, washing and curing. To be convinced of this, you have only to give Hyomei a trial, and Elbert & Wells will sell you an outfit with the understanding that if the trial is not satisfactory, your money will be refunded.

You cannot afford to trifle with catarrh trouble, for if neglected it grows worse and the annoyance and danger rapidly increase. It is best to use Hyomei at the first symptoms of catarrh, such as stoppage of the nose, offensive breath, raising of mucous, groupings in the throat, spasmodic coughing. The sooner you use Hyomei, the sooner you will be freed from all these troubles.

## MUSCULAR RHEUMATISM STIFF NECK

treatment often gives speedy relief when  
all else fails, Antiseptic, Healing, Stainless.

### CURRENT COMMENT.

#### TWO WHALES.

Report on The Internal and External  
Anatomy.

Something less than a year ago we printed in Forest and Stream an account of the adventures of two young men who went down to Amagansett, L. I., to recover the remains of two whales (Balaena glacialis). A report on the external and internal anatomy of these specimens has just been printed in the Bulletin of the Museum of Natural History by Mr. Roy C. Andrews, who wrote the account for Forest and Stream.

The two whales went ashore, one near the village of Amagansett, the other near the village of Wainsoot. The Amagansett whale, originally reported as measuring fifty-six feet seven inches from tip of the snout to the end of the flukes, was measured by Mr. Andrews after the flukes had been removed and appears to have been about fifty-four feet long, measured from the tip of the snout over the back to the notch of the flukes. The Wainsoot whale, measured in a straight line from tip of snout of flukes, was forty feet three inches. The length of the blowhole was ten inches in the Amagansett whale and eight and one-half inches in the Wainsoot specimen, and the longest whalebone, excluding the bristles, was five inches in the Amagansett specimen.

In the Wainsoot whale the color was everywhere dense ivory black, with no indication whatever of a lighter color on the fins or flukes, and while the Amagansett specimen was chiefly of the same black, there were some streaks and spots of white on the flukes, flippers and in some other places. While the right whale is generally an unbroken black, there is testimony that they are occasionally marked with white below. Capt. J. B. Edwards speaks of some that he has seen that had the breast and throat nearly white, and similar specimens are noted in the "Whalebone Whales of North America."

The eyeball of the Amagansett whale measured on the preserved specimen after the eyeball had been trimmed of matter which had adhered to it 3 3/4 inches from before backward and 3 inches from above downward. The iris was clear brown, surrounded by a narrow, irregular ring of light color. The pupil is elliptical. Its longitudinal diameter being 1 3/4 inches.

The osteology of the whales is described, and figures are given of many of the bones and of the wrist with its ossifications.

It is interesting to note that the Amagansett whale exceeds in size the largest whale ever recorded, and that its examination demonstrates that there is some color variation in the species—Forest and Stream.

### Stamps By Slot Machine

The stamp window, as any one who has patronized it during the rush hour can testify, is one place where all are equal before the law. And if the lot of the man on the inside of the window is not altogether agreeable, neither, for that matter, is that of the man on the outside. Accordingly, the testing of the stamp-vending slot machine, authorized by the Government, will be followed with interest. Two slot machines have been installed in the main corridor of the general post office in New York, undergoing a test of prove successful, they will come into general use, materially lessening the labors of the employees at the smaller offices, where stamp-selling is a large share of the work, and relieving to a large extent the press at the stamp windows of the cities.

The stamp-vending machines, if it does no more than handle the retail trade in the smaller denominations, should prove of some advantage to the public. The machine has not won its way to the present trial without opposition. Notably among its foes was the congressional who, in his zeal to prove it worthless, was molested by the police a few days ago for feeding it bad money. But the bad money argument is as old as the slot machine (which is to have originated in Egypt in the period of the Pharaohs); but both the bad money and the machine are still with us. If the device proves successful it should furnish a relief from conditions which are at present often awkward. At the opening trial yesterday there was an indication that Uncle Sam was being cheated, inasmuch as the one-cent machines began to feed out two-cent stamps, but that is a slip in operation which should be easily remedied.—Boston Transcript.

### TO INCREASE ROAD'S CAPITAL.

Directors Plan For The Illinois Cen-  
tral.

New York, March 19.—The directors of the Illinois Central railroad company yesterday voted to authorize the holding of a special meeting of stockholders to vote on an increase of thirty per cent in the company's capital stock. At yesterday's meeting of the directors E. Ogden Armstrong was elected a director to succeed Stuyvesant Fish.

## LABOR MEN IN SESSION

Discusses Supreme Court's  
Late Decisions

### AMENDMENTS TO LAW

Will Be Considered—Union Men Will  
Set Forth Their Position—Rhode  
Island Mills Announce 10 Per  
Cent. Wage Reduction.

Washington, March 19.—A conference of far-reaching importance to labor began here yesterday. There are 117 national and international trade unions in America, and practically all of them are represented by one or more delegates. The conference, which was held behind closed doors, will continue for several days.

Participating are President Gompers and the members of the executive council of the American Federation of Labor, together with the executive officers of the international trade unions of America, who met pursuant to a call issued by Mr. Gompers to consider the consequences of the recent injunction decisions of the supreme court of the United States affecting labor organizations with particular reference to the Danbury hat-makers' case, in which that court substantially held that labor organizations were to be considered trusts as much as organizations of capital.

After calling attention to the significance of these decisions, Mr. Gompers stated that the conference was for the purpose of "taking such action as the importance and merits of the subject dealt with may be considered and determined as setting forth the position and demands of labor." The court's rulings, he said, were binding upon all labor organizations until changed or modified by congressional action.

The object of the conference, therefore, was to consider the proposed amendment to the Sherman anti-trust act which are being drafted with a view not of exempting labor organizations from their obligations to the public, but rather to prevent any injustice being done through the operation of law to organizations of laboring men particularly through the injunction.

It is desired so to frame the proposed changes in the Sherman law as to meet the requirements of the supreme court's decisions. The proposed amendments are the result of recent conferences at the White House between President Roosevelt and others and it is hoped to secure remedial legislation along these lines at this session of Congress.

President Gompers yesterday stated that matters of importance to every union man would be discussed and an effort made to formulate plans to offset the rulings of the various courts regarding injunctions and boycotts.

## VICTORY FOR MITCHELL IN MINERS' FIGHT

Majority Report Will Probably Be  
Adopted by Indianapolis Conven-  
tion—Lewis Forces Are  
Angry.

Indianapolis, Ind., March 19.—It is authoritatively admitted that the scale committee of the miners will present two reports. The vote for the majority report will be fifteen and for the minority report, which will be presented by Vice-President Lewis and his friends, will have six votes.

The majority report, which is favored by President Mitchell and his friends, will advocate settlement by districts as was done two years ago. This, in all probability, will be adopted by the convention, but it will only be after a hot fight.

The Lewis report will advocate a postponement of the matter until after April first, as is asked by the Ohio operators. The idea of Lewis' friends is that a settlement after April 1 will redound to the credit of Lewis. It will also work to discredit President Mitchell as being unable to reach a settlement.

Mitchell believes, it is said, to have assurance that the Indiana operators will sign at once. This, he believes, is all that is needed to whip the other operators into line. It did it two years ago and it did it successfully.

From indications, the policy of the national convention is settled. Adjournment is expected by to-night, and the convention will carry out the Mitchell policy.

### Teacher to Wed Senator Gallinger?

Washington, March 19.—Women have lobbied for men in political positions before, but seldom has political devotion led to matrimony, as in the case reported of Senator Jacob H. Gallinger of New Hampshire, who it is said, is engaged to marry Miss Ida M. Daly, an instructor in English in the Washington public schools. She is the writer of several authoritative works on English, and is a leader in educational circles here.

It is said that Miss Daly enthusiastically lobbied for Senator Gallinger in order to make him chairman of the committee of the District of Columbia, because she believed he had the best interests of the district and the schools at heart. This deepened into a romance, it is said, and early announcement of their engagement is now expected.

### NO STOCK TAX.

Congress Not to Act on Hepburn's  
Bill.

Washington, March 19.—The Hepburn bill, levying a tax of one-half of 1 per cent on all stock transactions, will not be passed at this session of Congress. The measure is pending in the committee on ways and means. No action will be taken on it at this time.

## MUCH UNNECESSARY MISERY HERE DUE TO INDIGESTION

Why not let Diapepsin digest  
your food for awhile and let  
your Stomach rest until it  
gets back its strength.

Your stomach will not right itself—indigestion will not go. You can wish all you please. You may wish you weren't troubled or wish you were well, or wish you could eat like Bill Smith or Sarah Jones—that won't cure you. Stop wishing. Don't complain. Get your stomach in order. There is nothing really wrong.

Use 22-grain Triangle of Diapepsin, eaten like candy after your next meal, will prove to you, five minutes after, that there is nothing radically wrong with your stomach. Your digestive system is unstrung—that's all—needs a vitalizer—more gastric juice. Yes, more digestive juices—then you can eat what you want without the slightest fear of indigestion or dyspepsia or that your food will sour or lay like a lump of lead.

Diapepsin contains the very elements necessary to digestion, and when placed at work in the weak stomach and small intestines supply exactly what these organs need. They stimulate and replenish the gastric glands and promptly bring the digestive organs back to their normal condition.

When Diapepsin works your stomach rests—gets itself in order, cleans up, and then you feel like eating when you come to the table.

A case of Diapepsin is worth more than you pay to any man or woman whose stomach is out of order, and you will say so, too—yes, you will. Go now and cure yourself, and afterwards please tell other people of the peculiar and prompt way Diapepsin has of digesting food and giving relief to weak-stomachs.

### HAYTI YIELDS TO WARSHIPS, AND LETS FIRMIN GO.

Safe Conducts Given Revolutionary Agi-  
tators, Danger to Foreign Lega-  
tions Is Over, French  
Report.

Paris, March 19.—Official advices received here from Hayti indicate that the arrival at Port au Prince of foreign warships has produced the desired effect upon President Nord Alexis.

French Minister Carteron cables that the government has abandoned its intention of attacking the rebels, and that the government of the rebels has been authorized and that safe conducts have been granted for the departure of Gen. Firmin and the other revolutionary agitators who had taken asylum at the legations and consulates at Port au Prince and Gonaives.

Mr. Carteron gives much credit for this improved state of affairs to the active intervention of Mr. Borno, the minister of state, who was first to counsel this course of action.

All danger of an attack on the legations or consulates is now considered at an end.

The report that the diplomatic representatives at Port au Prince have presented an ultimatum to President Alexis involving his resignation is declared here to be without foundation. The French government fully approves the course of action followed by Mr. Carteron.

### UNUSUAL REQUEST.

Made By Late Dr. John Ordronaux to  
Dartmouth College.

Hanover, N. H., March 19.—The will of the late Dr. John Ordronaux, class of 1830, leaves \$20,000 to Dartmouth college, under an unusual and interesting provision, as follows:

"I give and bequeath to the trustees of Dartmouth college in New Hampshire the sum of \$20,000, but in trust only, as a special fund, and upon the express condition, that immediately upon its acceptance, they will proceed to establish a permanent fund, designated to be known as the 'Ordronaux fund,' the principal of which shall be kept continually invested, and the income arising therefrom be annually distributed either wholly, or in part, according to the judgment of the trustees, among such of the professors in its academic department, as shall have continuously served therein for the space of forty years. And, in the distribution of these annual subsidies, I also direct that preference be given to the superior claims of those professors who are either broken in health, or who shall have received in the aggregate amount of their salaries, the least sum total in compensation for their services."

### CLERGY BUY COIN FOR \$1,200 FOR THE POPE.

Only Piece of Innocent IX in Existence  
Completes Vatican Collection.

Rome, March 19.—The Pope yesterday received the members of the Sacred College, who greeted him on the occasion of his name day.

The pontiff told the cardinals how a certain gold coin had been given to him as a jubilee gift by the diocese of Aquila. This coin was discovered in 1898 while excavations were being made for the foundation of a new church at Aquila. It was found to be the only coin in existence of the period of Innocent IX, a pope who reigned two months in 1591.

The diocese of Aquila was unable to pay the architect who had drawn the plans for the new church, so it gave him the coin
